

Tasman District Council Street Tree Lists				
Botanical Name	Common Name	Size Range	Site Selection / Comments	Special Features
SMALL BERM (up to 1.5 metre wide)				
<i>Acer buergerianum</i>	Trident maple	Small - medium	Hardy tree for most conditions. Drought tolerant once established. Prefers acid soil. Dislikes waterlogging. Tolerates paving	Small cream-coloured flowers in late winter. Rich autumn colours. Attractive mottled bark
<i>Acer capillipes</i>	Red snake-bark maple	Small - medium	Suited to free-draining soils. Ideal columnar shape for street planting	Red twigs and autumn colour. Attractive stripes on bark
<i>Acer griseum</i>	Paperbark maple	Small	Suited to free-draining soils. Good wind tolerance. Slow growing - good tree for limited space	Glossy red peeling bark. Red autumn colour
<i>Acer tataricum subsp. ginnala</i>	Amur maple	Small	Suitable for any soil and dry sites. Good maple for windy sites. Fast growing	Creamy white flowers early summer. Bright orange and red autumn colour
<i>Amelanchier asiatica</i>	Korean juneberry	Small	Amelanchier for drier sites. Few soil requirements, but prefers alkaline conditions	White spring flower. Autumn colours in red, orange & yellow
<i>Amelanchier canadensis</i>	Shad bush	Small	Amelanchier for wetter sites. Grows well in most soil types. Tolerates partial paving	White spring flower. Autumn colours in red, orange & yellow
<i>Cercis canadensis</i> (and cultivars)	North American redbud	Small - medium	Does well in most free draining soils. Dislikes wet clay soils. Young growth can be frost tender	Profuse and fragrant pale pink flowers in spring
<i>Cercis chinensis</i> (and cultivars)	Chinese redbud	Small	Suited to most free-draining, and dry soils. Dislikes waterlogging. Young growth can be frost tender	Masses of pink flowers in spring. Yellow autumn colour
<i>Chionanthus retusus</i>	Fringe tree	Small	Grows in most soil types, tolerates wet conditions. Vase shaped crown	Fragrant white flowers in early summer. Yellow autumn colour. Small blue fruit taken by birds
<i>Cornus florida</i>	Flowering dogwood	Small	Prefers free-draining acid soils. Good wind tolerance	Late spring flowers. Red and purple autumn colours
<i>Lagerstroemia indica</i>	Crepe myrtle	Small	Hardy tree with few soil requirements. Drought tolerant, dislikes waterlogging. Tolerates paving	Abundant showy pink flowers in summer. Attractive mottled bark. Rich autumn colours
<i>Nyssa sylvatica v. biflora</i>	Twin flowered tupelo	Small - medium	Suitable for wet soils. Much smaller than N.sylvatica	Brilliant orange and red autumn colours
<i>Parrotia persica</i>	Persian ironwood	Small	Prefers a well drained soil, tolerates dry conditions. Quite slow growing. Usually requires training for single stem	Small red winter flowers. Attractive mosaic bark. Autumn colours - yellow, orange, red, purple
<i>Pistachia chinensis</i>	Chinese pistachio	Small	Prefers a free draining site. Tolerates paving. Can be slow to establish	Brilliant autumn colours
<i>Pterostyrax hispida</i>	Fragrant epaulette tree	Small - medium	Suited to most free-draining soils. Not for exposed sites or paved areas. High ornamental value	Hanging fragrant white flowers in summer
<i>Sorbus hupehensis</i>	Hupeh mountain ash	Small	Sorbus for more sheltered sites. Suited to most free-draining soils	White flower clusters. Blue/green foliage. Red autumn colour. Small white/pink berries
<i>Sorbus latifolia</i>	Service tree of Fontainebleau	Small - medium	Hardier Sorbus for more exposed sites. Can grow on poor soils. Tolerates paved areas	Large white flower clusters. Yellow autumn colour. Abundant berries loved by birds
<i>Styrax japonicus</i>	Snowbell tree	Small	Prefers good soil, and tolerates wet sites. Not for exposed sites	Masses of white snowbell-like spring flowers. Yellow autumn colour
NZ Native (small berm)				
<i>Kunzea ericoides</i>	Kanuka	Small - medium	Quick growing for poor soils and exposed sites. Winter shade - avoid planting NE, N, NW of property	Profuse white flowers in summer
<i>Hoheria angustifolia</i>	Narrow-leaved lacebark	Small - medium	Quick growing, hardy erect tree. Tolerant of full sun and frosts. Winter shade - avoid planting NE, N, NW of property	Slender attractive tree, masses of white flowers in summer
<i>Leptospermum scoparium</i>	Manuka	Small	Good for most sites and soils, and tolerates wet conditions. Winter shade - avoid planting NE, N, NW of property	Profuse white flowers in mid-summer
<i>Plagianthus regius</i>	Manatu, Lowland ribbonwood	Small - medium	Hardy tree with few soil requirements. Quick growing. Semi deciduous, but still need to consider winter shade angles	White flowers in summer. Semi deciduous
<i>Sophora microphylla</i>	South Island Kowhai	Small	Grows well on most sites and soils. Winter shade - avoid planting NE, N, NW of property	Graceful habit, yellow flowers in spring attract tui and bellbirds
<i>Sophora longicarinata</i>	Kowhai - Golden Bay	Small - medium	Avoid acid soils. Winter shade - avoid planting NE, N, NW of property	Lemon yellow flowers in spring attract nectar feeding birds
MEDIUM BERM (1.5 - 3m wide)				
<i>Acer campestre</i>	Field maple	Small - medium	Tough maple for exposed sites, and any soil except dry and sandy. Tolerant of industrial pollution. Responds well to pruning	Rich autumn colours.
<i>Acer capillipes</i>	Red snake bark maple	Small - medium	Suited to free-draining slightly acid soils. Not for exposed sites. Ideal columnar shape for street planting	Red twigs and autumn colour, attractive stripes on bark
<i>Acer davidii</i>	Père David's maple	Small - medium	Does well in most free draining soils. Dislikes waterlogging. Not for paved conditions. Good wind tolerance	White/green flowers late spring. Green bark with white stripes. Red and orange autumn colour
<i>Acer tataricum subsp. ginnala</i>	Amur maple	Small	Suitable for any soil and dry conditions. Good maple for windy sites. Fast growing	Creamy white flowers early summer. Bright orange and red autumn colour
<i>Acer negundo</i>	Box elder, Manitoba maple	Medium	Vigorous and hardy tree, tolerates most sites and soil conditions	Attractive flowers and fruit. Yellow autumn colour
<i>Albizia julibrissin</i> (and cultivars)	Silk tree, Mimosa tree	Small - medium	Suitable for dry soils. Drought tolerant. Good for windy sites. Late to come into leaf. Flat topped form - excellent shade tree	Pink feathery flowers in mid-summer. Leaflets close in the evening
<i>Carpinus japonica</i>	Japanese hornbeam	Small - medium	Hardy tree for most soil types and conditions. Good wind tolerance. Quick to establish	Attractive pendant hop-like seeds in late summer. Golden yellow autumn colour
<i>Celtis australis</i>	Southern nettle tree, Hackberry	Small - medium	Grows well in hot dry conditions and poor soils. Dislikes waterlogging. Tolerates paved areas	Dark green foliage. Small black berries eaten by birds
<i>Cercis canadensis</i> (and cultivars)	North American redbud	Small - medium	Does well in most free draining soils. Dislikes wet clay soils. Young growth can be frost tender	Profuse and fragrant pale pink flowers in spring
<i>Cercis siliquastrum</i>	Judas tree	Small - medium	Good drought tolerance. Dislikes wet clay soils. Not for windy sites. Broad spreading form at maturity	Masses of magenta flowers in spring
<i>Cercis siliquastrum alba</i>	White flowered Judas tree	Small - medium	Good drought tolerance. Dislikes wet clay soils. Not for windy sites. Broad spreading form at maturity	White flowers in spring. Cauliflory (flowering from bark)
<i>Cladrastis lutea</i>	American yellow wood	Small - medium	Suited to most free-draining soils. Prefers sheltered sites	White fragrant pea-like flowers. Bright yellow autumn colour

<i>Corylus colurna</i>	Turkish hazel	Medium	Grows in most soil types and conditions, prefers sandy/alkaline soils. Suitable for exposed sites. Tolerates paving	Silvery bark. Catkins late winter. Note - popular street tree overseas
<i>Fraxinus ornus</i>	Manna ash	Small - medium	Tolerant of drought and exposed sites. Tolerates paving.Suited to most free-draining soils but prefers alkaline conditions	Abundant fragrant white flowers in early summer
<i>Ginkgo biloba 'Fastigiata' (male tree only)</i>	Upright Ginkgo, Maidenhair tree	Medium	Tolerant of urban conditions, paving and air pollution. Can be slow to establish - requires good soil. Dislikes very windy sites	Narrow form. Golden yellow autumn colour. Note - cultivar 'Fastigiata' is a male selection.
<i>Koelreuteria paniculata</i>	Golden rain tree, Varnish tree	Small - medium	Drought and heat tolerant. Suitable for most soil types	Summer flowers. Yellow and orange autumn colours
<i>Liquidambar styraciflua</i> (cultivars)	Sweet gum	Medium - large	Grows in most soil types, will tolerate wet conditions. Select cultivars for reduced stature and vigour	Brilliant full range of autumn colours
<i>Melia azedarach</i>	Bead tree, Persian lilac	Small - medium	Drought and heat tolerant. Dislikes waterlogging and exposed sites. Responds well to pruning	Pale purple flowers in summer. Persistent berries - winter silhouette. Yellow autumn colour
<i>Nyssa sylvatica v. biflora</i>	Twin flowered tupelo	Small - medium	Suitable for wet soils. Much smaller than <i>N.sylvatica</i>	Brilliant orange and red autumn colours
<i>Phellodendron amurense</i>	Amur Cork tree	Small - medium	Grows on most soil types, more suited to moist sites	Attractive corky bark. Yellow autumn colour
<i>Prunus padus</i>	Bird cherry	Small - medium	Grows in most soil types, suited to wet conditions	Racemes of fragrant white flowers in spring. Good autumn colour. Small black cherries for birds
<i>Pyrus calleryana</i> (and cultivars)	Ornamental pear	Small - medium	Very hardy. Good for difficult urban sites - heavy clay, waterlogging and drought, also coastal conditions. Tolerates paving	Showy white spring flowers. Rich autumn colours
<i>Sorbus latifolia</i>	Service tree of Fontainebleau	Small - medium	Hardier Sorbus for more exposed sites. Can grow on poor soils. Tolerates paved areas	Large white flower clusters. Yellow autumn colour. Abundant berries loved by birds
NZ Native (medium berm)				
<i>Alectryon excelsus</i>	Titoki	Small - medium	Grows in most soil types and conditions. Frost tender when young. Winter shade - avoid planting NE, N, NW of property	Glossy green foliage.
<i>Hoheria angustifolia</i>	Narrow-leaved lacebark	Small - medium	Quick growing, hardy erect tree. Tolerant of full sun and frosts. Winter shade - avoid planting NE, N, NW of property	Slender attractive tree, masses of white flowers in summer
<i>Kunzea ericoides</i>	Kanuka	Small - medium	Quick growing for poor soils and exposed sites. Winter shade - avoid planting NE, N, NW of property	Profuse white flowers in summer
<i>Leptospermum scoparium</i>	Manuka	Small	Good for most sites and soils, and tolerates wet conditions. Winter shade - avoid planting NE, N, NW of property	Profuse white flowers in mid-summer
<i>Nestegis montana</i>	Narrow-leaved Maire	Small - medium	Local to Waimea Plains, and quite rare in this area. Can be frost tender when young. Winter shade - avoid planting NE, N, NW of property	Dark green leaves. Small purple berries
<i>Plagianthus regius</i>	Manatu, Lowland ribbonwood	Small - medium	Hardy tree with few soil requirements. Quick growing. Semi deciduous, but still need to consider winter shade angles	White flowers in summer. Semi deciduous
<i>Sophora longicarinata</i>	Kowhai - Golden Bay	Small - medium	Avoid acid soils. Winter shade - avoid planting NE, N, NW of property	Lemon yellow flowers in spring attract nectar feeding birds
<i>Sophora microphylla</i>	South Island Kowhai	Small	Grows well on most sites and soils.Winter shade - avoid planting NE, N, NW of property	Graceful habit, yellow flowers in spring attract tui and bellbirds
LARGE BERM (over 3m wide)				
<i>Acer negundo</i>	Box elder, Manitoba maple	Medium	Vigorous and hardy tree, tolerates most sites and soil conditions	Attractive flowers and fruit. Yellow autumn colour
<i>Albizia julibrissin</i> (and cultivars)	Silk tree, Mimosa tree	Small - medium	Suitable for dry soils. Drought tolerant. Good for windy sites. Late to come into leaf. Flat topped form - excellent shade tree	Pink feathery flowers in mid-summer. Leaflets close in the evening
<i>Alnus cordata</i>	Italian Alder	Medium	Especially hardy in poor soils and difficult conditions. Drought and wind tolerant. Tolerates paving. Fast growing	Glossy green foliage. Nitrogen fixer (improves soil)
<i>Carpinus caroliniana</i>	American hornbeam, Blue beech	Medium	Grows well in wet soils. Good for exposed sites. Slow growing	Smooth twisted bark with blue sheen. Blue/green flowers. Orange and red autumn colours
<i>Carpinus betulus 'Fastigiata'</i>	Upright hornbeam	Medium - large	Hardy tree for most soil types. Tolerates dry and wet conditions. Quick to establish. Tolerates paving	Yellow autumn colour. Dense canopy in summer
<i>Celtis occidentalis</i>	Hackberry, Nettle tree	Medium	Grows in most soil types, suitable for dry conditions. Tolerant of paving	Golden yellow autumn colour. Small black berries
<i>Cercidiphyllum japonicum</i>	Katsura tree	Small - medium	Prefers moist free draining soil and plenty of root space (large berm). Wind hardy. Tolerates partial paving	Small red fragrant spring flowers. Yellow & orange autumn colours
<i>Ginkgo biloba 'Autumn Gold'</i>	Maidenhair tree	Medium - large	Tolerant of urban conditions, paving and air pollution. Can be slow to establish - requires good soil. Dislikes very windy sites	Golden yellow autumn colour. Note - cultivar 'Autumn Gold' is guaranteed male tree
<i>Ginkgo biloba 'Fastigiata' (male tree only)</i>	Upright Ginkgo, Maidenhair tree	Medium	Tolerant of urban conditions, paving and air pollution. Can be slow to establish - requires good soil. Dislikes very windy sites	Narrow form. Golden yellow autumn colour. Note - cultivar 'Fastigiata' is a male selection.
<i>Liriodendron chinense</i>	Chinese tulip tree	Medium	Prefers good soil and plenty of root space (large berm). Good wind tolerance. Much smaller in stature than American tulip tree	Tulip-like flowers in summer. Yellow autumn colour
<i>Liriodendron tulipifera 'Fastigiatum'</i>	Upright tulip tree	Medium	Prefers good soil and plenty of root space (large berm). Sensitive to root disturbance. Good wind tolerance	Tulip-like flowers in summer. Yellow autumn colour
<i>Liquidambar styraciflua</i> (cultivars)	Sweet gum	Medium - large	Grows in most soil types, will tolerate wet conditions.Select cultivars for reduced stature and vigour	Brilliant full range of autumn colours
<i>Magnolia kobus</i>	Kobus magnolia	Medium	Cold hardy magnolia. Dislikes alkaline soils	Fragrant flowers in early spring
<i>Nyssa sylvatica</i>	Tupelo	Medium - large	Suitable for wet sites. Will grow smaller in dry conditions	Brilliant autumn colours
<i>Paulownia tomentosa</i>	Foxglove tree, Empress tree	Medium	All soil types, dislikes waterlogging. Rapid initial growth. Not for windy sites	Bold fragrant lilac-coloured flowers in spring
<i>Quercus palustris</i>	Pin oak, Swamp oak	Large	Very hardy. Requires a lot of space long term. Does well on all soil types, suitable for wet conditions.	Orange, red and purple autumn colours
<i>Quercus prinus</i>	Chestnut oak	Medium - large	Smaller than <i>Q. palustris</i> . Rare in NZ, worthy of trial	Attractive furrowed bark
<i>Styphnolobium japonicum</i>	Pagoda tree	Medium - large	Grows well on most soil types. Suitable for dry conditions and tolerates drought. Not for windy sites	Feathered leaves. Creamy-white flowers in summer
<i>Tilia cordata</i>	Small-leaved linden	Medium - large	Tree for any soil type and suited to dry conditions. Good wind resistance including coastal. Tolerates paving. Requires plenty of space long term	Small fragrant flowers in summer. Yellow autumn colour.
NZ Native (large berm)				
<i>Alectryon excelsus</i>	Titoki	Small - medium	Grows in most soil types and conditions. Frost tender when young. Winter shade - avoid planting NE, N, NW of property	Glossy green foliage.
<i>Elaeocarpus dentatus</i>	Hinau	Medium	Dislikes waterlogging and overly dry conditions. Slow growing.Winter shade - avoid planting NE, N, NW of property	Racemes of white flowers in summer

<i>Myoporum laetum</i>	Ngaio	Small - medium	Quick growing for exposed coastal sites, seawind and poor soils. Tolerates light frosts. Winter shade - avoid planting NE, N, NW of property	Glossy green foliage. Attractive small white flowers. Broad spreading growth habit
<i>Nestegis montana</i>	Narrow-leaved Maire	Small - medium	Local to Waimea Plains, and quite rare in this area. Can be frost tender when young. Winter shade - avoid planting NE, N, NW of property	Dark green leaves. Small purple berries
<i>Plagianthus regius</i>	Manatu, Lowland ribbonwood	Small - medium	Hardy tree with few soil requirements. Quick growing. Semi deciduous, but still need to consider winter shade angles.	White flowers in summer. Semi deciduous
<i>Sophora longicarinata</i>	Kowhai - Golden Bay	Small - medium	Avoid acid soils. Winter shade - avoid planting NE, N, NW of property	Lemon yellow flowers in spring attract nectar feeding birds
<i>Sophora microphylla</i>	South Island Kowhai	Small	Grows well on most sites and soils. Winter shade - avoid planting NE, N, NW of property	Graceful habit, yellow flowers in spring attract tui and bellbirds
URBAN AREAS - paved or sealed				
<i>Acer buergerianum</i>	Trident maple	Small - medium	Hardy tree for most conditions. Drought tolerant once established. Prefers acid soil. Dislikes waterlogging. Tolerates paving	Small cream-coloured flowers in late winter. Rich autumn colours. Attractive mottled bark
<i>Alnus cordata</i>	Italian Alder	Medium	Especially hardy in poor soils and difficult conditions. Drought and wind tolerant. Tolerates paving. Fast growing	Glossy green foliage. Nitrogen fixer (improves soil)
<i>Celtis australis</i>	Southern nettle tree, Hackberry	Small - medium	Grows well in hot dry conditions and poor soils. Dislikes waterlogging. Tolerates paved areas	Dark green foliage. Small black berries eaten by birds
<i>Corylus colurna</i>	Turkish hazel	Medium	Grows in most soil types and conditions, prefers sandy/alkaline soils. Suitable for exposed sites. Tolerates paving	Silvery bark. Catkins late winter. Note - popular street tree overseas
<i>Lagerstroemia indica</i>	Crepe myrtle	Small	Hardy tree with few soil requirements. Drought tolerant, dislikes waterlogging. Tolerates paving	Abundant showy pink flowers in summer. Attractive mottled bark. Rich autumn colours
<i>Liquidambar styraciflua</i> (cultivars)	Sweet gum	Medium - large	Grows in most soil types, will tolerate wet conditions. Select cultivars for reduced stature and vigour	Brilliant full range of autumn colours
<i>Parrotia persica</i>	Persian ironwood	Small	Prefers a well drained soil, tolerates dry conditions. Quite slow growing. Usually requires training for single stem	Small red winter flowers. Attractive mosaic bark. Autumn colours - yellow, orange, red, purple
<i>Pistachia chinensis</i>	Chinese pistachio	Small	Prefers a free draining site. Tolerates paving. Can be slow to establish	Brilliant autumn colours
<i>Pyrus calleryana</i> (and cultivars)	Ornamental pear	Small - medium	Very hardy. Good for difficult urban sites - heavy clay, waterlogging and drought, also coastal conditions. Tolerates paving	Showy white spring flowers. Rich autumn colours
<i>Ulmus parviflora</i>	Chinese elm, Lacebark elm	Small - medium	Suitable for dry, free-draining soil conditions and will tolerate short term waterlogging. Copes well with heat and exposure	Mottled orange platey bark. Glossy dark green leaf
<i>Ulmus pumila</i>	Siberian elm	Small-medium	Very drought tolerant. Quick growing. All soil types except heavy clay. Will tolerate a strongly alkaline soil. Suitable for wet or dry conditions	Light green flowers in spring
<i>Zelkova serrata</i>	Japanese zelkova, Keaki	Small-medium	Prefers moist free draining soil. Tolerates paving. Popular urban tree overseas	Patterned flaking bark. Autumn colours - yellow, orange & red.
NZ Native (urban areas - paved or sealed)				
<i>Alectryon excelsus</i>	Titoki	Small - medium	Grows in most soil types and conditions. Frost tender when young. Fruit can be messy over car parks. Be aware of winter shade angles	Glossy green foliage.
<i>Kunzea ericoides</i>	Kanuka	Small - medium	Quick growing for poor soils and exposed sites. Winter shade - avoid planting NE, N, NW of property	Profuse white flowers in summer
<i>Leptospermum scoparium</i>	Manuka	Small	Good for most sites and soils, and tolerates wet conditions. Winter shade - avoid planting NE, N, NW of property	Profuse white flowers in mid-summer
<i>Plagianthus regius</i>	Manatu, Lowland ribbonwood	Small - medium	Hardy tree with few soil requirements. Quick growing. Semi deciduous, but still need to consider winter shade angles	White flowers in summer. Semi deciduous
<i>Sophora microphylla</i>	South Island Kowhai	Small	Grows well on most sites and soils. Winter shade - avoid planting NE, N, NW of property	Graceful habit, yellow flowers in spring attract tui and bellbirds
RAIN GARDENS				
<i>Alnus cordata</i>	Italian Alder	Medium	Especially hardy in poor soils and difficult conditions. Drought and wind tolerant. Tolerates paving. Fast growing	Glossy green foliage. Nitrogen fixer (improves soil)
<i>Alnus glutinosa 'Imperialis'</i>	Cut-leaved Alder	Small - medium	Cold and wind hardy. Suited to wet soil conditions. Fixes nitrogen into soil. Note - good example growing in Bramley Street rain gardens	Feathery foliage. Very attractive tree
<i>Alnus tenuifolia</i>	Western American alder	Small	Tolerates wet sites, flooding, and sites with strongly fluctuating watertable. Vigorous young growth but small at maturity. Fixes nitrogen to soil	Smooth reddish bark. Pendulous catkins. Quite rare in NZ - worthy of trails
<i>Amelanchier canadensis</i>	Shad bush	Small	Grows well in most soil types. Prefers moist conditions	White spring flower. Red, orange, yellow autumn colours
<i>Carpinus caroliniana</i>	American hornbeam, Water beech	Medium	Few soil requirements, prefers loam. Grows well in wet soils. Good for exposed sites. Quite slow growing	Smooth twisted bark with blue sheen. Blue/green flowers. Orange and red autumn colours
<i>Metasequoia glyptostroboides</i>	Dawn redwood	Large	Suitable for wet soil. Needs plenty of space - for large berms only	Pyramidal habit. Deciduous conifer with orange autumn colour
<i>Nyssa sylvatica</i>	Tupelo	Medium - large	Suitable for wet sites. Quite slow growing. Needs space long term - for large berms only	Brilliant orange and red autumn colours
<i>Nyssa sylvatica v. biflora</i>	Twin flowered tupelo	Small - medium	Suitable for wet soils. Much smaller than N.sylvatica - use in berms/gardens <3m wide	Brilliant orange and red autumn colours
<i>Styrax japonicus</i>	Snowbell tree	Small	Prefers good soil, tolerates wet sites. Not for exposed sites. For small berms/gardens	Masses of white snowbell-like spring flowers. Yellow autumn colour
NZ Native (rain gardens)				
<i>Cordylone australis</i>	Cabbage tree, Ti kouka	Small - medium	Tolerates wet conditions. Good for group plantings. Consider winter shade angles	Summer flowers, attractive silhouette
<i>Leptospermum scoparium</i>	Manuka	Small	Good for most sites and soils, and tolerates wet conditions. Winter shade - avoid planting NE, N, NW of property	Profuse white flowers in mid-summer
CAR PARKS				
<i>Albizia julibrissin</i> (and cultivars)	Silk tree, Mimosa tree	Small - medium	Suitable for dry soils. Drought tolerant. Good for windy sites. Late to come into leaf. Flat topped form - excellent shade tree	Pink feathery flowers in mid-summer. Leaflets close in the evening
<i>Alnus cordata</i>	Italian Alder	Medium	Especially hardy in poor soils and difficult conditions. Drought and wind tolerant. Tolerates paving. Fast growing	Glossy green foliage. Nitrogen fixer (improves soil)
<i>Betula platyphylla</i>	Manchurian birch	Medium	Fast growing. Easily pruned for sight lines. Dislikes heavy clay. Suitable for exposed and windy sites	White reflective bark. Yellow autumn colour
<i>Carpinus betulus 'Fastigiata'</i>	Upright hornbeam	Medium - large	Hardy tree for most soil types. Tolerates dry and wet conditions. Quick to establish. Tolerates paving	Yellow autumn colour. Dense canopy in summer

<i>Celtis australis</i>	Southern nettle tree, Hackberry	Small - medium	Grows well in hot dry conditions and poor soils. Dislikes waterlogging. Tolerates paved areas	Dark green foliage. Small black berries eaten by birds
<i>Ulmus parviflora</i>	Chinese elm, Lacebark elm	Small - medium	Performs well in urban conditions, dry and poor soils. Will tolerate short term waterlogging. Copes well with heat and exposure	Red/purple autumn colour. Mosaic patterned bark
<i>Zelkova serrata</i>	Japanese zelkova, Keaki	Small-medium	Prefers moist free draining soil. Tolerates paving. Popular urban tree overseas	Patterned flaking bark. Autumn colours - yellow, orange & red
CAR PARKS (NZ Native trees)				
<i>Hoheria angustifolia</i>	Narrow-leaved lacebark	Small - medium	Quick growing, hardy erect tree. Tolerant of full sun and frosts. Winter shade - avoid planting NE, N, NW of property	Slender attractive tree, masses of white flowers in summer
<i>Plagianthus regius</i>	Manatu, Lowland ribbonwood	Small - medium	Hardy tree with few soil requirements. Quick growing. Semi deciduous, but still need to consider winter shade angles	White flowers in summer. Semi deciduous
<i>Sophora microphylla</i>	South Island Kowhai	Small	Grows well on most sites and soils. Winter shade - avoid planting NE, N, NW of property	Graceful habit, yellow flowers in spring attract tui and bellbirds
<i>Kunzea ericoides</i>	Kanuka	Small - medium	Quick growing for poor soils and exposed sites. Winter shade - avoid planting NE, N, NW of property	Profuse white flowers in summer
TRAFFIC ISLANDS				
<i>Betula platyphylla</i>	Manchurian birch	Medium	Fast growing. Easily pruned for sight lines. Dislikes heavy clay. Suitable for exposed and windy sites	White reflective bark. Yellow autumn colour
<i>Pseudopanax crassifolius</i>	Lancewood	Small - medium	Hardy and suited to most soil types and growing conditions. Looks good planted in groups	NZ Native. Attractive foliage, bark and silhouette
<i>Pseudopanax ferox</i>	Toothed lancewood	Small	Drought tolerant. Dislikes wet conditions. Plant in groups. Rare in NZ	NZ native. Attractive foliage, bark and silhouette
