

Tabled @
NRSBU - 9/3/18

Meeting notes and actions arising from the

Quarterly NRSBU Customer Group

Date 7 March 2018

Place TDC Richmond

Attended by:

NRSBU Cr. Stuart Walker; Jeff Robinson; Johan Thiar

NPI Philip Wilson

Alliance Terry Kreft

ENZA Foods Kim Beloe; Peter Entwhistle

TDC Juliet Westbury

Nelmac Alan Jones

Customer Updates

- ENZA Foods – owned by T&G. Due diligence is still underway on a potential sale of the operation – we will be kept updated. Not running their juice plant. Will start their 'solids' line around 3rd April through to September – a 24 hour operation.
- Alliance – have had a very busy period but have recently stopped the night shift and unlikely to replace the night shift for most of this year. Expecting a busy period in April – but only one shift required. Terry Kreft confirmed that he is retiring – will inform us of his replacement when known – we thanked him for his very long input into the NRSBU operation.
- NPI – nothing specific to report on
- Tasman District Council – Juliet gave an update on recent weather events and overflows. Confirmed that there is an ongoing project to identify and mitigate infiltration
- Nelson City Council – not represented however Stuart Walker confirmed that dealing with infiltration is a high priority.

Resource Consents

Agreed action:

- Aberrational Discharge Consent
Send a copy of the Consent Decision and Conditions to all Customer Groups.
The conditions have formalised a protocol of the three industry customers ceasing to discharge when there is a risk of the Saxton pump station over flowing.
We need to collectively agree on a revised protocol to work within the conditions.
Alan Jones said he would circulate the current list of contacts from the Contingency Response Procedures – for updating as required.

Agreed there is some urgency in updating our processes around this.

- Resource Consent Renewal application
We will send a copy of the Council Notification to the 5 customers who we wish to consider putting in a submission – note the close off date.

Best Island Residents Meeting [Odour]

Philip Wilson gave a verbal summary of how we performed at the meeting on 15th February – he scored us 3 out of 10 – in his view a poor response from the NRSBU team.

Jeff Robinson acknowledged that we could have been better prepared – and we can learn for future meetings. The positive outcome was that there were 23 people at the meeting – of which 13 were residents.

Storm modelling

Noted that where applicable – we will share results of any extra modelling and specifically on elevations above sea level.

Regional Pipeline

are in the process of
We ~~have engaged~~ a consultant to start investigating the options of how best to secure our regional pipeline and will invite input from each of you.
