

A forest of new trees to enhance Waimea Inlet

A cash injection from the Government's One Billion Trees project means a million dollars' worth of trees will be planted around the Waimea Inlet from this month, helping to beautify the area and provide habitats for fish, insects and birdlife, including the shy, endangered banded rail.

This winter, about 40,000 trees, shrubs and grasses from local nurseries will be planted on the estuary's shores from Māpua to Nelson, including Moturoa/Rabbit and Rough Islands.

The first of several community plantings will happen on June 14, and the project is looking for volunteers to help, though details will depend on COVID-19 gathering restrictions.

Tasman Environmental Trust secured the \$1m funds injection to plant the trees in the next three seasons and manager Sky Davies says although community plantings are held on the Waimea Inlet every winter, this year's effort will be a big one.

"We're really looking at a big step up in the efforts to restore native habitat in the inlet," she says. "It's building on the work of Battle for the Banded Rail, the Māpua Community Association, Forest and Bird, Keep Richmond Beautiful, Tasman District Council and Nelson City Council."

Though now a highly-modified environment, the Waimea Inlet is the largest enclosed estuary in the South Island and vital for fish wildlife habitat, including fern bird, marsh crake, spotless crake and the nationally endangered Australasian bittern. But it hasn't always been appreciated in the past.

That is now changing, Sky says. "The longer-term vision would be to see it as a really thriving healthy ecosystem again that can be appreciated and enjoyed by the communities around it," she says.

"It's been a transition from people looking at it as a muddy eyesore to people realising it's a really beautiful, dynamic, important ecosystem that is worthy of protection and enjoyment."

Upcoming planting dates:

- Sunday 14 June, 9.00 am 1.00 pm, Research Orchard Road Reserve #1.
- Sunday 21 June, 9.00 am 1.00 pm, Bronte Peninsula – DOC Reserve. Access is from 22 Bronte Road East. Park on Bronte Road.

For more information and future planting day dates, visit the website, tet.org.nz or email bandedrail@gmail.com.

Councillor Dean McNamara – Moutere-Waimea Ward

As we emerge from lockdown it's becoming clear a lot of people are hurting out there, either with businesses struggling or people without jobs. The effects of this pandemic will be felt for a while.

I campaigned to represent you and to bring more accountability and financial prudence to Council.

I believe we need to make some hard decisions to keep your debt and rate increases under control.

The money we are borrowing may seem like free money with the

current low interest rates, but one day interest rates will go up again and even at our current debt level every 1 per cent increase in interest rates will increase your rates 2.7 per cent to pay the interest alone.

If you think that an ageing Tasman population, a low wage economy, and a district struggling with the effects of COVID-19 should not be taking on increasing levels of debt then I encourage you to voice your concerns during the Long Term Plan early engagement process and consultations.

Councillor Dean McNamara Moutere-Waimea Ward

Barry Dowler elected in Motueka ward by-election

Following the close of voting on 26 May, Barry Dowler was elected as a councillor representing the Motueka ward.

The by-election came about as a result of the resignation of Claire Hutt in December 2019.

"This was one of the more unusual elections we have had to hold due to the restrictions placed on candidates, and to a degree, the voters by the COVID-19 lockdown", said Electoral Officer Sandra Hartley.

"Despite representations to the Government regarding the difficulties posed by the lockdown, the legislation covering local government elections did not allow either the Government or ourselves to delay the by-election."

The number of votes received is in line with previous elections, showing Motueka residents are very interested in who is representing them at the Council table, despite the challenges of the COVID-19 restrictions.

The final results are as follows:

Barry Dowler 1,318

Nick Hughes 869 Gary Watson 429 Jennifer Beatson 408 Tania Corbett 388 Elisabeth Siegmund 192 Maxwell Clark 191

Voter turnout was 42.23% with 3,808 votes cast.

COVID-19 information

The single best source for the latest information on COVID-19 and the current Alert Level restrictions is the all of government website covid19.govt.nz

Please keep doing the right thing at Alert Level Two:

- COVID-19 is still out there. Play it safe.
- Keep your distance from other people in public.
- If you're sick, stay home. Don't go to work or school. Don't socialise.

- · If you have symptoms of cold or flu call your doctor or Healthline and get tested.
- · Wash your hands. Wash your hands. Wash your hands.
- Sneeze and cough into your elbow, regularly disinfect surfaces.
- Keep track of where you've been and who you've seen.

Council Services under Alert Level Two

All Council offices, libraries and facilities (recreation centres, playgrounds, swimming pools,

skate parks, reserves) have re-opened. However, due to the Alert Level Two restrictions there are some limitations.

Contact tracing and physical distancing measures are in place at all venues. Be aware that not all library programmes are happening at the moment and there have been changes to opening hours.

This may change if the Government alters the current restrictions so you can keep in touch with the latest information by visiting our website, tasman.govt.nz, our Facebook page or giving us a call on 03 548 3400.

Changes coming for plastic recycling

Starting from 1 July we'll only be collecting plastics that can be recycled in New Zealand – these are the ones labelled with 1, 2 and 5.

These three plastics are the most common, representing around 85 – 90% of the plastics we use. Most of the containers that you use will still be recycled: soft drink and water bottles, clear plastic meat trays, plastic milk bottles, bathroom, kitchen, and laundry products, and ice-cream, butter and takeaway containers.

The plastics that we will not be collecting from 1 July are plastics 3, 4, 6 and 7. These plastics are used in some food and product packaging like single serve yoghurt pottles and most sour cream containers. These cannot be recycled in New Zealand and are very difficult to find an overseas market for. There is also concern that some of these plastics may not be recycled appropriately.

So please start thinking about the plastics that you buy now, reduce plastic where you can, start checking the number (usually found on the bottom of the item) and aim to buy only 1, 2 and 5 ahead for the changeover date on 1 July.

From crisps to crates

The nation's lockdown potato chip habit is helping to drive sustainability at a Hope company that uses Proper Crisps' waste vegetable oil to power its business.

Philip and Marie Gardiner's company Crate Services Ltd takes returnable plastic crates (RPCs) from vegetable growers and supermarkets, cleans them, and redistributes them to growers throughout New Zealand and worldwide, which means a massive reduction in cardboard cartons.

The company washes between 6,000 and 7,000 crates per day, using hot water to reduce chemical use. They recently bought a beer-crate

washing plant from Germany to accommodate these numbers, and the boiler that heats the water is run on pre-loved vegetable oil from cult Stoke brand Proper Crisps.

"When we were changing over to hot washing we thought, can we do this better?" Philip says. "It would probably be cheaper if we went over to diesel, but I'm not keen on doing that."

Sustainability permeates other areas of Crate Services' business too. The company also maintains the wood pallets onto which the produce crates are loaded. Any damaged pallets are sent to Auckland for repair and recycling, and to reduce the environmental footprint, they're shipped by the coast rather than trucked.

Being sustainable is great, Philip says, and he doesn't like to throw anything out. But when it comes to running a business, environmental awareness also has to make economic sense.

"We try our best," he says. "You do your little bit, and then you just keep doing your bit."

Proper Crisps general manager Andy Leonard says it's great to see their waste product being re-used.

"Both environmentally-speaking and also commercially, because it's a little bit of value back for us as well," he says. "Generally, things like that need to work both from a sustainability perspective and a commercial perspective and this does."

Reduce the smoke haze - clean burning tips

Keep your fire burning cleanly and limit your contribution to winter air pollution – dry wood and a good flow of air are all you need.

Domestic fires are a major contributor to winter air pollution. Luckily, all wood burners can be operated in a way that reduces the amount of smoke they produce.

- Use dry, untreated firewood
- Keep a good flow of air going

Once your fire is burning brightly, head outside to check the smoke coming out the chimney. A thin wisp of light-coloured smoke is what you're aiming for.

Please don't be tempted to bank up your fire and then turn the air flow down, as this is one of the biggest contributors to smoke haze overnight.

Look for the Good Wood tick

When you choose a Good Wood supplier, you're opting for a trusted source of dry firewood that will burn well, helping to keep your home warmer and our air cleaner.

Good Wood suppliers can provide seasoned firewood, suitable for immediate use.

For more tips on how to keep your wood burner burning warm and clean and a list of Good Wood suppliers, head to tasman.govt.nz/link/good-wood.

Progress on the Brightwater Town Centre upgrade

Prior to work shutting under COVID -19 Level Four restrictions, this project had made good progress:

- · Power lines between the Lord Rutherford Road and Ellis Street intersection and Starveall Street have been moved underground.
- A new footpath has been built alongside the Brightwater Reserve and the road crossings at either end were reinstated.
- · Work on installing new kerb and channelling on either side of Bryant Road and around Somerville Lane had begun.

What's next?

The team are sticking to the COVID-19 safety protocols and carrying on with the next steps:

- Installing kerbing along Bryant Road towards Starveall Street for the planter islands.
- Trenching has started again from Starveall Street and is heading towards Brightwater School.
- · Houses with existing overhead power connections will be switched to the new underground cable.

The switch-over process will begin this month and should be finished by the end of August. The necessary power shutdowns will be staged to minimise disruption and any affected households will be told in advance when the power needs to go off.

Thanks to the residents for their continued patience while we carry out this work to transform the centre of Brightwater into a community hub.

Community consultation planned on safe drinking water

Currently five of Tasman District Council's 15 water supplies do not have permanent residual disinfection through the use of chlorine: Upper Takaka, Hamama, Motueka, Riwaka/Kaiteriteri and Richmond. The Council will be consulting with the community on a proposal to introduce chlorination permanently to those five supplies to ensure water is safe to drink.

There are two main reasons for this proposal. Firstly, providing safe drinking water is at the very core of what councils do. We have a duty to do so and an obligation to our residents to ensure the water supply is as safe as we can make it. Secondly, there is Central Government legislation that obliges us, and all councils, to prove we are meeting that responsibility.

Central Government legislation

All councils around New Zealand are being held to higher standards for drinking water quality. This stems from the enquiry into the Havelock North Contamination Event in 2016. Their water supply became contaminated with campylobacter, resulting in approximately one-third of the town (over 5,000 people) becoming sick, 45 people hospitalised and four deaths.

Having permanent residual disinfection using chlorine, as part of a multi-barrier treatment approach, was one of the recommendations from the Government's inquiry.

Not all councils in New Zealand chlorinate their water. The Director General of Health has told these councils they will need to demonstrate their preventative measures are effective and that they can maintain water quality from source to tap.

Does our water measure up?

Under the current systems in place on some water supplies, it will be difficult for us to meet the standard required. For instance, while Council carries out testing of non-chlorinated supplies, it can take at least 24 hours to get a sampling result. If contamination is found, the users on that supply could potentially have been exposed to contaminated water for at least 24 hours.

Contamination can come from a number of sources: work on the water supply network, backflow events (water re-entering the supply), illegal connections, pipe breaks, faulty fittings, illegal water takes from hydrants or through damage to reservoir roofs.

Advice from the Government is that our Water Safety Plans will not be approved unless we have residual disinfection or good justification as to why it is not required, which we have been unable to do. Chlorination is the most widely used method throughout the world to provide residual disinfection in drinking water supplies.

Next steps

Council staff will prepare information on the possible options and this will form the basis of the consultation with the community, scheduled to happen in July 2020.

Dangerous roadside tree removal – rural areas

In conjunction with the Ministry of Business, Innovation and Employment (MBIE), Tasman District Council is offering a free service to remove hazardous trees from rural roadsides and adjacent properties, where they pose a risk to road users.

The aim of this project is to improve the safety of our roads and redeploy workers from all industries who have been negatively impacted by the COVID-19 response.

We'd like to know about any problems in your area, particularly:

- · Overhanging trees or branches that could fall onto the footpath or road.
- · Overgrown trees that reduce road users' views of the road.

· Roadside trees that are interfering with overhead power lines.

Fill in the online submission at tasman.govt.nz (search = tree hazard), or email us at projects@tasman.govt.nz, with your name, contact phone number, the location of the hazard and a brief description of the problem. If you can, please provide photos.

Once received, we'll assess your submission and prioritise it according

to the risk to the public. If action is required, we'll assign the work to one of our teams, who will then be in touch to discuss the options available.

Please note: This is a "one time only" initiative with a fixed, 100% Ministry funded budget, managed by Tasman District **Council. Qualified tree specialists** will be engaged for all tree felling and limb removal work.

Youth photo competition for Matariki

Tasman District Council invites young people (aged 12 – 24) to submit their photographs for a contest dedicated to the Matariki Celebration. Entries are invited until 28 June.

The star cluster Matariki appears in our skies in the month of Pipiri (June-July), marking the start of the Māori New Year.

This year we are celebrating our local stars, heroes and heroines tuahangata/tuawahine. For this contest, we welcome photos that show your own heroes and heroines, people who have had significant

impact on your personal life or people who you admire and respect.

Other Matariki themed photos are also welcome and there are \$100 Prezzy Card prizes available in each category as well as spot prizes to be won.

Find out more at tasmanyouthhub.co.nz.

What are you putting down your drain?

Please remember that only rain and clean tap water should go down your outside stormwater drains.

Your stormwater drains are located around the exterior of your house and can usually be identified by the downpipes coming from your roof. Along with roadside gutters, they connect directly to our waterways, estuaries and the beach, so we need to be careful how we dispose of our run-off.

There were several stream pollution incidents recently as people carried out DIY projects at home and then used outside drains to wash down paint brushes and gib stopping equipment. Our Richmond urban streams have many ecosystems in them, and contaminants like paint and household pesticides can poison fish, eels and in some instances dogs that have been in the stream.

Here are some common ways pollution enters our streams from the things you might be doing at home:

• Detergents, oil and heavy metals from washing cars.

- Paint from people washing brushes in the street gutter or over a storm water drain.
- Dust from cleaning down gib-stopping equipment.
- · Oil from leaking vehicles.

All these pollutants end up in our streams and rivers where they reduce the quality of the water, making it unsuitable for swimming or drinking and difficult for plants and fish to survive.

How you can help

Washing your car:

- Wash it on the grass as grass acts as a natural filter. Use a bucket rather than a hose to minimise water use and runoff.
- Clean up oil spills, fix leaking cars, collect and recycle used motor oil.

DIY painting or gib-stopping – these products contain toxic chemicals which are harmful to the environment:

 Wash brushes over grass or in a laundry sink (inside drains go to the sewerage system for treatment).

- Small amounts of waste paint can be left to completely dry in the tin, and then be disposed of in your general rubbish.
- Save unnecessary washing by wrapping your paint brush or roller in cling wrap or a plastic bag. This will prevent them drying out for at least an hour.

Before doing things like exterior painting or water blasting find out where the nearest stormwater sump is, seal it off and divert wastewater onto your lawn or garden.

What do I do if I see someone dumping stuff into a stormwater drain?

If it's someone you know – tell them that what they're dumping is going to end up in our streams and estuary, and encourage them to do the right thing. If you see a stranger dumping into a stormwater drain, please call the Council as soon as possible on 03 543 8400.

Book A Book!

Make the most of our takeaway and home delivery book service when you Book a Book at Motueka, Richmond and Takaka libraries.

Simply fill in the form on our website, or give us a call on 03 543 8500, and we'll select up to five books, DVDs and magazines for you. Then you can either send a friend or family member to pick them up, or we'll deliver them right to your door.

This free service is designed to support the more vulnerable

members of our community; especially people aged 70+ or with medical conditions which make leaving the house difficult.

If you know someone who would benefit from this service, please let them know about it. Get the details on our website, tasmanlibraries.govt.nz and search on "book a book".

Under Level 2, Tasman District Libraries are now open Monday to Friday, 10.00 am – 4.00 pm and on Saturdays from 10.00 am – 1.00 pm in Richmond, Motueka and Takaka for quick borrowing and returns missions. Our after-hours returns bin will be open on Saturdays from 9.00 am – 1.00 pm. Please check our Facebook page or website for updates.

Speeding up the region's infrastructure processes post COVID-19

Tasman District and Nelson City Councils are streamlining their tendering process for capital physical works projects, allowing a faster return to work on major projects.

There will be a change in process that will dispense with the more formal tendering procedures, but will still allow for checks and balances, ensuring good value for money for Council and all ratepayers.

Richard Kirby, Tasman District Council's Engineering Services Managers says, "Our approach aims to see work allocated efficiently and fairly for all contractors in the Nelson/ Tasman region.

"We will work with a panel of contractors, looking at the projects we intend to do over the next 12 months or so. We'll be asking them to indicate which they are interested in, then work through a fair allocation process with their involvement. They would need to price the projects

they were allocated and we would go through a fair value, due diligence assessment.

"Once this is approved by our Tenders Panel, which can meet at short notice, work could get underway.

"For larger projects, a mini-tender process may be used but we'll look at that on a case-by-case basis."

The New Zealand Transport Agency and the Civil Contractors Federation have been consulted about the change and are supportive of this approach.

Apply for a rates rebate before 30 June

The deadline for applications for a rates rebate for the 2019/2020 rating year is 30 June 2020.

Rebates are based on your household income, the amount of your rates, and the number of dependents you have. You can estimate if you're eligible for a rebate using your income for the tax year ending 31 March 2019 at dia.govt.nz – search 'rates rebate'.

You can apply for a rates rebate if:

 You pay the rates on the address that you live at; and

- · You were living at the address at the beginning of the rating year (1 July); and
- · Your name is recorded in the Rating Information Database (RID) as ratepayer.

You cannot claim a rates rebate if the property is used mainly for commercial purposes such as farming or business.

Application forms and more information are available at Council offices or online at tasman.govt.nz.

You'll need to provide income information so your rebate can be worked out. Check the website for details of the documentation you need to supply or give the helpful customer services team a call on 03 543 8400.

KEEPING YOU INFORMED ABOUT NEWS AND EVENTS IN THE TASMAN DISTRICT • 5 JUNE 2020

Now's your chance – tell us what you think of us!

An annual survey of Tasman residents' satisfaction with their Council is underway. We have commissioned the National Research Bureau (NRB) to carry out the survey. The survey provides data on people's levels of satisfaction with our services, and on which Council decisions they approve or disapprove of. We urge anyone who is contacted to take part to use the opportunity to give feedback - the results help shape the future of the services and facilities we provide to the community. The interviews this year will be conducted by telephone, along with some online surveys. With changes in demographics and use of technology, we want to make sure those who do not have a landline phone are represented. NRB will survey 400 residents over the age of 18, using a randomised selection method. NRB will contact residents until 9 June. Although the results of the survey are made public, individual survey respondents' details are confidential. Of course there have been many changes to the delivery of Council services recently due to the COVID-19 restrictions, but the survey must be done now so we can meet our legal requirements around levels of service for the Annual Report.

Council news direct to your inbox

News and updates about Council projects, services and consultations are now available direct to your email inbox. COVID-19 restrictions meant we weren't able to deliver Newsline to homes throughout the District each fortnight. Although we're able to deliver again now, you may wish to have it emailed to you as well, along with other Council news. Visit the website, tasman.govt.nz, search on "latest Newsline" and follow the link to join the mailing list.

Do your trees hang low?

Now is a good time to check that the vegetation on your property hasn't become a nuisance. If you have a hedge, shrubs or trees that grow alongside a footpath it's up to you to make sure they don't make it hard for people to get past - including those with prams or mobility scooters. So please take a walk around your property and check if any trees, shrubs or bushes need a haircut.

Moturoa Rabbit Island – Nelson Marlborough Fish & Game Pheasant Hunt

Public access to the eastern half of Moturoa/ Rabbit Island will be closed on two days this winter while an organised game bird hunt takes place. Please note that the closure will include all of the beach front at the eastern end.

Fish and Game organise the hunts, which are permitted on a trial basis under the Moturoa/Rabbit Island Reserve Management Plan. The hunts are timed to coincide with low tide to avoid any effect on shore birds. No hunting is allowed within 100 metres of the high tide mark.

This year the hunts will take place on the following dates:

- Saturday 27 June, 8.30 am 3.00 pm (Sunday 28 June reserve day)
- Saturday 11 July, 8.30 am 3.00 pm (Sunday 12 July reserve day)

Map of area closed due to hunting:

2020 vision of the future -Long Term Plan 2021 – 2031

Your direction on what we should be focusing on over the next ten years is really important to us. What projects or activities do you want completed in this Long Term Plan? Check out the pre-engagement document, 2020 Vision for Tasman – Whakakitenga Ruamano Rua Tekau on the website tasman.govt.nz/ feedback. But please be aware that the pre-engagement document was created prior to COVID-19 reaching New Zealand. In light of the potentially huge, but still not fully known, impact of the virus and our response to it, Council has extended the consultation period out to 12 June 2020. For anyone who has already provided feedback, thank you - your views will still be included. If you feel you want to give more or different feedback in light of recent events, you are welcome to do so.

Apply now for the Sport NZ Community Resilience Fund

Applications are open until 19 June for the Sport NZ Community Resilience Fund. The fund is to support regional and local sports organisations who are affiliated with a Sport New Zealand national investment partner. This means most play, active recreation and sport clubs are eligible to apply. Clubs can apply for an immediate grant of up to \$1,000 cash payment to cover their fixed costs for invoices such as rent, phone and power. Visit the Sport Tasman website sporttasman.org.nz and look under "Funding" to find out more and apply for funding to help your club get through these tough times.

Apply now for a Community Grant

Do you have an exciting community project or event in the pipeline? A Community Grant could help to make it happen.

Applications for our Tasman District Council Community Grants are open now and close on 31 July 2020. Funding is available for Tasman-based projects that meet a community need and have community support. Priority is given to projects that can show financial support from other sources as well.

Grants are available for projects that fit into the following categories:

- Community and economic development initiatives
- · Arts/culture/heritage/museums
- Festivals and events
- Youth and children
- Social services
- Environment
- **Emergency services**
- · Sports and recreation facilities.

To apply: Visit tasman.govt.nz/link/grants to download the Community Grants From Rates application form. Work on the application at your own pace - and save as you go. Send the completed application form back to us using the simple online form.

Get all the details online at tasman.govt.nz/ link/grants or email our Community Partnerships Coordinator Lani Evans on lani.evans@tasman.govt.nz if you have any questions.

Celebrating our community heroes

If you know of someone who you think deserves recognition for all their hard work, you can nominate them for an Outstanding Community Service Award.

Tasman District Council wants you to help identify and celebrate the wonderful people throughout our District by making nominations for this annual award.

Nominations are invited until 30 June 2020. Nominees must be residents of the Tasman District to qualify.

More information and nomination forms are available on the Council website, tasman.govt.nz and search "community awards."

You can also email your completed nomination form to gabrielle.drummond@tasman.govt.nz.

RESOURCE CONSENT APPLICATIONS

The Tasman District Council has received the following applications for resource consents which are being publicly notified. This is a summary notice only.

To view the full public notices, the application documents and to find out how you can make a submission, visit the Council's website. Copies of the applications and supporting information may also be examined in the Richmond and Motueka Offices of the Tasman District Council.

Any person may make a submission on the applications in accordance with Section 96 of the Resource Management Act 1991. Submission forms are available from Council offices and on Council's website.

Phil Doole Resource Consents Manager

Nelson Speedway

Applicant: Nelson Speedway Association Incorporated

Location: 123 Lansdowne Road, Richmond **Legal Description:** Lot 1 DP 10914, Pt Lot 2 DP 10914

Land Use (Application RM191306):

Land use consent to continue a recreational activity which is Speedway racing in breach of noise levels where the frequency of 15 race meetings per year is proposed to be varied from the existing resource consent, as follows:

- Meetings able to be held closer together than the existing 'fortnightly' (14 days apart) restriction;
- The ability to hold two separate two day events where racing will occur on two consecutive days and each day of racing will be considered a single meeting for the purpose of the 15 meetings cap.

The application also seeks the ability to hold a fireworks display at one race meeting annually, being a new activity.

These proposed new arrangements for Speedway race meetings are proposed to start from the 2020/21 racing season.

Submissions close Friday 26 June 2020.

For the full notice, go to tasman.govt.nz and use the keyword search "nelson speedway" or "speedway racing".

Olive Estate Lifestyle Village

Applicant: Integrity Care Group Limited

Location: Olive Estate Lifestyle Village on Hill Street (between Brenda Lawson Way and Fairose Drive), Richmond

Legal Description: Lot 2 DP 511511

The following resource consents are being sought for expansion and changes to the Olive Estate Lifestyle Village:

RM120928V2 – Change to conditions of resource consent RM120928V1 for the existing Village to allow for the relocation of the care facility, the construction of additional residential units and an amended site layout.

RM190790 – Land use consent to construct a compact density development (residential villas and apartments) and a community activity (care facility) off Hill Street, without provision of the public reserve indicated in the Tasman Resource Management Plan.

RM190789 – Subdivision boundary adjustment to provide for the care facility on Lot 6 and to amalgamate Lots 5, 7 and 8 with Lots 2 and 3 and to create a new Lot 9 to vest as road (extension of Fairose Drive) including consent for subdivision under the National Environmental Standard for Assessing and Managing Contaminants in Soil to Protect Human Health.

RM190791 – Land disturbance to undertake bulk earthworks in association with the construction of a compact density development and care facility including decommissioning and filling a pond.

RM191308 – Water permit for the 'take' of water associated with the de-watering of a pond.

The site is zoned Residential in the Tasman Resource management Plan.

Submissions close Monday 29 June 2020.

For the full notice, go to tasman.govt.nz and use the keyword search "Integrity Care Group" or "Olive Estate".

KEEP UP TO DATE: TASMAN.GOVT.NZ

Rating information is publicly available

Our rating information database includes information such as the property location, valuation number, capital and land value as at 1 July 2019 and current year's rates.

Rating information is available for you to view at any service centre during office hours. You can also search online at tasman.govt.nz/link/rates-search.

Notice given under section 28, Local Government (Rating) Act 2002.
