General Rules Applying in Respect of Charges

Charges will include all reasonable staff time associated with processing and assessing applications, excluding staff travel time to and from the site of the application and/or consent holder. Staff time will be charged at \$138.00 per hour inclusive of overhead component and GST from 1 July 2011. Costs associated with consent processing and assessment such as use of consultants and laboratory costs, where these skills cannot be provided by in-house staff, will be recovered at actual costs. This policy also applies to the monitoring of consent conditions where an annual charge is not made or where costs exceed the payable annual charge and Council elects to recover the difference.

Annual charges shall be due on 1 December or 30 days from the date of invoicing, whichever is the later, unless otherwise agreed in writing by Council. A standard administration fee of \$98.00 will be applied when a consent is deemed by the Council as not currently given effect to and the ability to give effect is not currently present.

Council reserves the right to require further deposits, interim payments or advance payments of amounts to be determined by the Resource Consents Manager or the Environment & Planning Manager if processing activity is protracted over time or will incur costs over and above the listed deposit or standard fees.

Where all or part of any deposit or charge is not paid, Council reserves the right not to process that application, or not to continue processing that application, in accordance with relevant statutory powers.

Reductions and waivers are generally not available. Reductions might be justified where the person liable to pay any charge reduces the costs to Council of carrying out its functions, including through self-regulation checks approved by Council.

There will be no charge on parties who choose to surrender a resource consent and provide written confirmation.

Where multiple resource consents are sought or required for related activities, the standard application lodgement fees (deposits) shall apply for each consent, except that the notification lodgement fee shall comprise one full deposit (\$5,000) plus 20 percent for each ~~accompanying application~~ **additional consent required**, provided that the Manager Consents or the Environment and Planning Manager have discretion to determine a lesser total lodgement fee when there are large numbers of separate consents required.

A 50% rebate applies to the annual charges for consents with consent-specific monitoring programmes where monitoring costs are being recovered separately. Specific arrangements will be made in relation to approved self-regulation inspections.

~~A \$25.00 (GST inclusive) discount applies per consent to dam where the consent holder also holds additional permits for a surface water take, where the additional surface water take is a take to storage or a take from storage.~~

~~A 50% discount applies to permits to take water if the take only occurs between May and October and goes to storage~~

Where a consent is being renewed and the activity is continuing, the applicant shall continue to be liable to pay any annual and/or monitoring charge.

Hydroelectric power generation, suction dredging, and land based fish farming annual charges will be based on the discharge and not the take as long as the take and discharge are of equal volume. If there is a consumptive off-take then that portion of the take will attract the annual charge as for other consumptive takes. Consents to take will still attract the minimum standard water permit annual charge.

Annual charges levied on holders of resource consents will be recovered whether permits are exercised or not.

The cost of Councillor hearing panels are set by the Remuneration Authority and will be charged accordingly. Commissioner costs shall be charged at

actual costs incurred. Where submitters request that a matter proceed to a hearing before independent Commissioners they shall meet the costs additional to those incurred had the matter have been heard by a panel of Councillors on the same time basis.

Water Supply Charges

A new services agreement is planned between Nelson City Council and Tasman District Council, for the supply of water to Nelson City ratepayers in the area of Champion Road, Garin College and the Wakatu Industrial Estate. Tasman District Council currently supplies water to these users, but under individual supply arrangements. The proposed agreement is for the supply of water to Nelson City Council, rather than to individual residents and businesses. If the proposed agreement proceeds, Nelson City Council will be responsible for the supply of water directly to its ratepayers who are currently supplied by Tasman District Council. The cost of the water supply from Tasman District Council to Nelson City Council is proposed to be the same as to rating units with a metered connection in Richmond.

The water supply agreements between the Council, Nelson Pine Industries Limited, ENZA Foods New Zealand Limited and Alliance Group Limited (Industrial Water Users) expired on 30 June 2010. The Council and the Industrial Water Users have not agreed on the terms of water supply beyond the expiry date and that dispute will be referred to arbitration. The Industrial Water Users currently pay the Council 35.47 cents per cubic metre of water supplied. The Council desires to set the same rates in relation to the rating units owned by Nelson Pine Industries Limited as it does for other rating units with a metered connection in Richmond. The Council also desires that Nelson City Council takes over responsibility for the supply of water to all properties within Nelson City currently supplied with water by Tasman District Council, including ENZA Foods New Zealand Limited and Alliance Group Limited, with the cost of the water supply from Tasman District Council to Nelson City Council being the same as for rating units with a metered connection in Richmond.

If the new services agreement does not proceed then the charges for water supplied by the Council to rating units in Nelson City, excluding the ENZA Foods New Zealand Limited site and the Alliance Group Limited site, will be the same as rating units with metered connections in Richmond (per cubic metre supplied) which is \$1.50 (excl GST) for 2011/2012 (2010/2011 \$1.28 excl GST). In addition, these properties are charged a fixed daily amount of 51.89 cents (excl GST) per day for 2011/2012 (2010/2011 44.99 cents excl GST per day).
