

Policy on Remission of Excess Metered Water Rates

Objective of the Policy

To provide relief to ratepayers who have excessive metered water rates due to a leak in their internal reticulation and to encourage ratepayers to get all leakage repaired promptly.

Conditions and Criteria

1. The policy will apply to applications from ratepayers who have excess water rates due to a leak in the property's internal reticulation. Internal reticulation commences at the point of supply (generally at the water meter) and goes directly to the dwelling. It includes the pipe work located within that dwelling. Reticulation additional to this internal reticulation and fittings on the exterior of the dwelling will not qualify for remission.
2. All applicants must submit their request in writing stating that there are no further leaks on the property and must provide proof of repair carried out by a registered plumber. (The only exemption to this requirement is that provided for Murchison as notified in the SR1978.340).
3. A remission will only be granted on the current account.
4. Where a remission is granted the ratepayer will be charged an amount equal to the maximum consumption at any one time charged for that rating unit in the past three years, provided it has been in the same ownership
5. Where ownership of a rating unit has been for less than six months, staff will monitor consumption for a period of three months to establish a reasonable consumption figure at which to charge.
6. The balance of the account owing will be remitted based on the above criteria.
7. Where there is an application for remission following a second leak within five years of the first application, the ratepayer will pay an additional charge of 75 percent of the difference between the consumption as calculated in clause 4 above and the actual metered consumption during the leak period.
8. Where there is an application for remission following a third or subsequent leak within five years of the first application, the application will be declined.
9. The Utilities Asset Manager has the delegated authority to approve remission of water charges.
