

STAFF REPORT

TO: Chairman and Members, Engineering Services Committee
FROM: Steve Elkington, Asset Engineer Roads
REFERENCE: B952
DATE: 17 November 2008
SUBJECT: **PARKING RESTRICTION CHANGES**

1 PURPOSE

To seek approval from the Engineering Services Committee to publicly advertise various parking restriction changes.

2 BACKGROUND

From time to time Council make changes to parking on roads and occasionally public car parks after receiving requests from the public or in association with roading projects. For example, these changes may involve no stopping lines associated with pedestrian facilities, limited time car parking on roads in front of schools or businesses and disabled car parking changes in public car parks.

Presently any changes to the bylaw are reported to Council for approval to be publicly advertised. Only after this process and depending on submissions, are the changes recommended to the full Council for inclusion into the existing bylaw.

3 COMMENT

The attached proposed changes have either been discussed with the affected parties and the changes implemented or require public consultation.

4 RECOMMENDATION

THAT the Engineering Services Committee approve for public consultation the attached schedule of parking changes.

Steve Elkington
