

STAFF REPORT

TO: Engineering Services Committee
FROM: Solid Waste Project Engineer
REFERENCE:
DATE: 25 January 2006
SUBJECT: St Arnaud Recycling Rating Area

BACKGROUND

Kerbside recycling commenced in June 2005 in St Arnaud, (which was already on the refuse route) as part of the roll-out of recycling to the rest of the district on the refuse route at this time.

There were a number of properties which were not identified at the time as being on the refuse route, so these properties were not rated. The contractor's route does in fact cover a wider area of St Arnaud township where there are some unrated properties. To correct this, it is proposed to extend to the rating area to all properties on the refuse/recycling route in St Arnaud.

The proposed rating area extension can be seen on the attached plans.

RECOMMENDATION

THAT the Engineering Services Committee approve the extension of the Recycling and Refuse Rating Area at St Arnaud to include all properties that are currently on the refuse/recycling route.

Emma Manhart
